

Ab Initio Developer Cover Letter

3569 Andria PortsSouth Caren, VT 35447

Dear Emerson Hauck,

I am excited to be applying for the position of ab initio developer. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for support for automated unit and integration tests for all functional changes, as well as User Acceptance Testing and production issues.

My experience is an excellent fit for the list of requirements in this job:

- Experience in data architecture in the financial services industry
- Experience with managing and maintaining interfaces built with Ab Initio software between operational & external environments to the business intelligence environment
- Experience with designing and developing extract, transform and load (ETL) processes
- Experience includes application support of a business intelligence solution
- Ab Initio software experience
- Ab Initio Architect Experience
- Experience in a data warehouse environment and knowledge of existing and emerging data integration approaches
- Will partner with Clinical Informatics Analysts, business and IT professionals to enable the optimization of data for analytic consumption & solution development

I really appreciate you taking the time to review my application for the position of ab initio developer.

Sincerely,

Ari Dickinson
