ABAP Programmer Cover Letter

514 Herman ForksWest Dallasshire, VA 48265

Dear Story Beer,

I am excited to be applying for the position of ABAP programmer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for consultation and support to Business and SAP team partners in relation to SAP objects developed.

My experience is an excellent fit for the list of requirements in this job:

- Demonstrated competence in ABAP applications development and maintenance, including all aspects of the ABAP Development Workbench
- Understanding of, and experience with, the SAP Data Dictionary, including the creation and maintenance of data tables, structures, and relationships as needed to support the application data model
- Experience developing and modifying output forms using both SAPScript and SmartForms
- Understanding of full systems development lifecycle from requirements gathering through implementation of various technical integration solutions
- Exposure in working in at least 2 Implementation projects
- Very good experience in Net weaver fundamentals with Core and Advanced ABAP Programming
- Should be familiar with ABAP objects, Classes, events, methods, modulepool programming, User-exits, BADI- s, SMART forms, and Adobe forms
- Should have working experience in integration projects involving middleware interfaces (PI/PO, Web Services)

Thank you for your time and consideration.

Sincerely,

Corey Larkin
