

ABAP Programmer Cover Letter

76376 Jones VistaEast Esther, MS 30680

Dear Indigo Ritchie,

Please consider me for the ABAP programmer opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for consulting on solutions including how to leverage standard SAP functionality and how to enable requirements while minimizing on-going maintenance costs in the assigned areas.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Document, provide ETA as per standards, and resolve service requests
- Resolve software and batch processing aborts and abnormal ends
- Provide status reporting of assignments
- Conduct system functionality review based on current code and/or technical specifications
- Meet with functional and/or technical staff to discuss technical approach and solutions and to explain system functionality
- Provide mentoring and knowledge transfer to less experienced programmers
- Generate OSS notes requesting assistance from SAP headquarters
- Research SAP documentation for fixes to reported problems

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Morgan Carter
