

Access Engineer Cover Letter

4010 Jeff Terrace West Bartonfurt, WV 63796-5688

Dear Zion Greenfelder,

I am excited to be applying for the position of access engineer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for reports and presentations on the status of security controls and security industry trends/technologies to ITS management.

My experience is an excellent fit for the list of requirements in this job:

- Knowledgeable about tools and debug techniques (Wireshark, Perforce, IxTracker, automation harness)
- Able to communicate in clear and concise manner with peers (QA and DEV groups)
- Should have very good understanding on testing methodologies
- Excellent and in-depth understanding of the TCP/IP and L2 & L3 protocols
- Hands on experience of using networking test equipments like Agilent N2X / IXIA / Spirent
- Demonstrate proficiency in a programming language preferably Perl or Shell scripts, TCL/TK
- Strong Expertise and Hands-on Experience designing and deploying Identity & Access provisioning solutions and Directory Services
- Strong Expertise and Hands-on Experience in designing and implementing IDaaS, Web Access Management

Thank you for your time and consideration.

Sincerely,

Campbell Feeney
