

Associate Software Engineer Cover Letter

30472 Emery NeckCodyshire, WY 68624-9448

Dear Brooklyn Olson,

In response to your job posting for associate software engineer, I am including this letter and my resume for your review.

In my previous role, I was responsible for guidance on Java coding standards and best practices for QA Automation Engineers.

Please consider my experience and qualifications for this position:

- Team development experience
- Exposure to VB.NET, C#.NET, ASP .NET or similar languages
- Software development experience for enterprise applications in a SaaS and on premise environments
- Experience with large scale web development
- Experience developing software that meets rigid security standards
- Experience with .NET application development and support
- Retail development/software experience in point of sale systems or back office
- Be transparent communicators able to build relationships within the organization and outside of it

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Story Wolf
