

Incident Analyst Cover Letter

64897 Armand SquaresGreenholtfort, IA 69480-6569

Dear Emerson Prosacco,

Please consider me for the incident analyst opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for management of enterprise security tools including, but not limited to, SIEM, endpoint security, web proxy, email protection, intrusion prevention and detection system, etc.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Assist with and help to establish a mechanism for prioritizing the changes
- Assists with and helps with the management of the change control process, in particular against scope and to ensure that existing obligations/deliverables are not undermined or unwittingly overwritten/replaced Ensure that approved changes are incorporated into project or programme and relevant documentation is updated and approved
- Co-ordinate with the contract and commercial managers for any approved changes that have a contract or commercial impact
- Familiar with security hardware and software firewalls, IPS/IDS, VPN, Proxy, and DLP
- Troubleshoot issues involving SOC operational tools
- Pro-active and self-motivated, committed to achieving deadlines and results
- Experience in IT investigations and forensic processes
- Sound understanding of IT infrastructure and management processes

Thank you for your time and consideration.

Sincerely,

Riley Rodriguez
