

IT Auditor Cover Letter

406 Deirdre NeckSouth Val, AR 98884

Dear Tatum Bartoletti,

I submit this application to express my sincere interest in the IT auditor position.

In my previous role, I was responsible for direction on their execution in order to analyze and evaluate risks and controls for Enterprise objectives including business applications used to support key business operations, information security, business and operational systems, networks, general computer controls, IT infrastructure, and other systems related processes and risk areas including those related to Enterprise objectives.

Please consider my qualifications and experience:

- Good knowledge in the area of information technology and IT systems
- Good knowledge in IT processes and / or business processes
- At least good English and German language skills (written and oral)
- High flexibility and willingness for business travel in Europe and worldwide
- Understanding of, and capabilities associated with application development, software architecture and IT operations
- Analyze processes and recommend alternatives to mitigate risks
- Certified Information Systems Auditor (CISA) designation
- Understanding of major information technology applications and/or infrastructure components and the basic aspects of computer systems, midrange and distributed/client server platforms, web based applications, thorough understanding and working knowledge of Nessus tool

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Finley DuBuque
