

.NET Architect Cover Letter

9639 Sook Drive
Lake Edwardstad, FL 54214

Dear Shiloh Considine,

In response to your job posting for .NET architect, I am including this letter and my resume for your review.

In my previous role, I was responsible for support in definition and maintenance of DBI technology positions, patterns and principles, reference architectures, target architecture, and standards.

Please consider my experience and qualifications for this position:

- Mergers and Acquisitions systems
- Technical expertise of programming languages (ASP.Net, VB6,), relational database management systems (MS SQL Server), application systems, operating systems, networks, and hardware capabilities
- Advanced knowledge of architecture standards, tools and frameworks such as Model-View-Controller (MVC)
- Experience in managing development teams using AngularJS, JQuery, Java, and other technologies to build customized solutions that support business requirements and drive key business decisions
- Experience in delivering technical leadership and setting best practices (e.g., integration and application development, deployment, testing, iterative refinement)
- Experience in defining and managing a change management (release) process to develop and implement new applications/code and updates to existing applications/code
- And technologies to business leaders, business concepts to technologists
- Timely status and communication of risks and issues to leadership

Thank you for considering me to become a member of your team.

Sincerely,
