

.NET Architect Cover Letter

522 Lubowitz CliffsPort Robin, GA 95459

Dear Riley Emmerich,

In response to your job posting for .NET architect, I am including this letter and my resume for your review.

In my previous role, I was responsible for oversight to ensure current state Enterprise Architectures are well defined and domain specific architectures are in alignment with enterprise level strategy and direction; proposes new architecture where appropriate.

Please consider my qualifications and experience:

- Knowledge of at least two business domains (Travel and Hospitality, Finance, Retail, Healthcare & Life Science)
- Strong background in design and implementation of external services integrations (using REST, SOAP and/or ESB)
- Experience with and understanding of cloud IaaS and PaaS technologies (like Azure, AWS, Rackspace)
- Expertise in architectural styles, enterprise architecture patterns, integration patterns, development patterns
- Demonstrated experience in solution cost estimation (including tools, tasks, complexity, labor & time) at coarse grain levels, with supporting material evidence
- Practical experience with full life cycle of software development processes like RUP or "Waterfall" or MSF
- Technology and Business domain-specific knowledge as applicable (specified by particular EPAM Solution Practices)
- Possess the necessary soft skills to lead a team of architects and buddy architects towards an organizational goal

Thank you in advance for taking the time to read my cover letter and to review my resume.
