

Research Analyst Cover Letter

559 Franeki PrairieHermannside, AL 98605-8618

Dear Avery Rowe,

In response to your job posting for research analyst, I am including this letter and my resume for your review.

Previously, I was responsible for support for data analysis using SAS or R or an equivalent data science tool.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Provide analytical support for the development of analytics models to identify networks, predict future threats, and isolate and evaluate threat scenarios
- Work in data science teams that include intel analysts, data and visualization experts, and software developers
- High level of numeracy and comfort with analysing data – growth trends
- Confidence in engaging with trade sources in order to gain additional insight and validate information found in the public domain
- Good knowledge of India's macro and socio-economic trends
- Strong interest in FMCG industries ranging from food & beverages, beauty and personal care, health care, to retail, finance, travel and foodservice
- Highly knowledgeable of SPSS Base, SPSS Reporter, Microsoft Excel, and Microsoft PowerPoint
- Adept at performing statistical analysis

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Ryan VonRueden
