

Systems Analyst Cover Letter

725 Connelly Route Jaredburgh, MS 36422

Dear Tyler Breitenberg,

I am excited to be applying for the position of systems analyst. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for recommendations to business users in the effective use of applications, and identify opportunities that can improve efficiency of business processes.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience working on web-based applications
- Extensive knowledge of design and development tools
- Requires general knowledge in the following areas
- Familiarity with development of RAM program plans, product lifecycle RAM analysis (including software, electronic hardware and mechanical systems), and assessment of RAM of suppliers' products
- Experience in development and application of RAM models and tools
- Familiarity with statistical analysis related to RAM
- Familiarity with systems engineering processes and design concepts, including documentation and methodologies used
- Excellent verbal and written communication along with demonstrable analytical and presentation skills

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Gray Borer
