

Systems Analyst Cover Letter

4103 Rolande LocksNew Laraineside, MD 21045

Dear Morgan McClure,

I submit this application to express my sincere interest in the systems analyst position.

Previously, I was responsible for on-going evaluations and validation of IT control effectiveness and internal business processes as they relate to compliance activities within areas of responsibility.

My experience is an excellent fit for the list of requirements in this job:

- Facilitate mechanical, hardware, and software integration of new prototypes and new products including complete systems, manipulators, and vision
- Analyze complex electro-mechanical devices for dynamic safety and clinical risk
- Implement motion control algorithms
- Create safety monitoring algorithms based on sound physics
- Participate in clinical observations and experiments to ensure that performance requirements are relevant and realistic
- Document and pursue intellectual property
- Communicate system performance to the organization as a whole
- Improve group work-flow through tool building and teaching others Support and track system performance as it moves from design to manufacturing

Thank you for taking your time to review my application.

Sincerely,

Greer Kozey
