Systems Analyst Cover Letter

22044 Silas IsleSouth Valene, VA 86579

Dear Oakley Kozey,

Please consider me for the systems analyst opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for tailored ad hoc financial analysis and advice to support the business as it strives to improve its processes and manage its costs.

Please consider my qualifications and experience:

- Experience with scripting, including PowerShell, VBA, Python, or JavaScript
- Experience with software version control, including SVN or GIT
- Knowledge of Cybersecurity, NIST, DIACAP, RMF, and FISMA
- DoD 8570 IAT II Compliance Professional Certification, including Security+ or CISSP
- Collaborating in a team environment to establish best practices in software and database development
- Collecting user requirements for current and future reports/web pages
- Database work including creating tables, views, data transfer, data validation, creating database links, data mining, inserting/updating/deleting data and building stored procedures
- Working with minimal oversight and taking initiative to get projects completed

I really appreciate you taking the time to review my application for the position of systems analyst.

Sincerely,

Bellamy Cruickshank
