UX Architect Cover Letter

215 Bashirian MewsWestborough, MD 94584

Dear Phoenix Turner,

In response to your job posting for UX architect, I am including this letter and my resume for your review.

Previously, I was responsible for necessary coordination, facilitating prototyping / formal workshop design sessions with work process representatives to gather functional and usability requirements.

Please consider my qualifications and experience:

- A self-starter who will take ownership of projects, come up with new ideas to support and improve the team
- Attention to detail - Portfolio demonstrating strong concepts, designs/IA documentation of user-centered experiences, and/or research activities
- Experience working with Adobe CS and prototyping tools such as Axure, InVision, Sketch
- Translate requirements into wireframes and mockups
- Maintain familiarity with the capabilities of various programming technologies (JavaScript, HTML/CSS,) and their impact on development efforts, user interface possibilities, data accessibility, and compatibility across multiple versions of the same platform (web browsers, mobile OS)
- A commitment to high quality work and to positive and productive relationships with all - clients, team members, peers, managers
- Maintains and exercises strong knowledge/expertise in the factors that help inform and communicate the architecture/design
- Maintains strong knowledge of web and mobile information architecture and design best practices

Thank you for considering me to become a member of your team.

Sincerely,
