Our company is growing rapidly and is looking for a product manager. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for product manager

- Evangelize internally and externally for Revit structural products as applied to design and fabrication for reinforced cast-in-place concrete and precast concrete construction methods
- Use industry and technical expertise to guide teams to create products that solve structural market problems using innovation, technical software knowledge, and distinctive competence and creativity
- Manage structural product enhancements and creation from concept through strategic planning to tactical execution, helping set priorities
- Communicate and advocate for product roadmaps to internal leadership and stakeholders
- Establish viable solutions and services that solve targeted market problems and achieve business goals
- Work with Operations, Marketing, and other key stakeholders to successfully deliver products to market
- Provide product strategy leadership to assigned product core teams in order to orchestrate product planning and execution in support of sales, market reach and customer satisfaction targets
- Attend industry events in support of product research and advocacy
- Articulate the company's vision
- Demonstrate solid market sensibility

Qualifications for product manager

- 5+ years of experience in a highly technical or highly analytical role highly desired
- Familiarity with data center business or data center technologies
- Develop PRDs, define and agree priorities in conjunction with Engineering Leads
- Collaborate with other Product Managers across different BUs in developing new features and ensuring appropriate support
- Drive cross-functional initiatives
