

Example of UX Architect Job Description

Powered by www.VelvetJobs.com

Our company is looking for an UX architect. Please review the list of responsibilities and qualifications. While this is our ideal list, we will consider candidates that do not necessarily have all of the qualifications, but have sufficient experience and talent.

Responsibilities for UX architect

- Be energetic, motivated, team oriented, and a fast learner
- Participate in initial strategy sessions to help identify and set direction for achieving project objectives
- Partner with Business Unit Leads, Product Managers and other stakeholders in Marketing, Business and Technology to understand their unique goals, objectives and challenges
- Mine end user research, insights from subject matter experts and analysis of current site metrics to understand target audiences' needs, behaviors, tasks, and goals and translating them into creative User Experience concepts
- Lead development of user experience deliverables by internal team or agency partner including user flows, information architecture & page layout, interaction design, content strategy, copywriting and visual designs
- Collaborate closely with project management and experience design team to ensure successful, timely delivery of each experience design deliverable
- Support identification of appropriate metrics and development of a measurement plan
- Demonstrate solid knowledge of user-centered design principles and best practices, attention to detail, and superior workmanship standards
- Advocate user focus across the organization and communicate the value and principles of user experience design to members of various product teams
- Research and validate users' current and future needs, and communicating those needs across the team

-
- Develop and maintain a close relationship with product management
 - Oversee and respond to various small project requests and freely offer UX guidance and feedback via the team inbox
 - A digital design degree or equivalent qualification and an excellent portfolio
 - Ecommerce experience - fashion related a plus
 - Exposure to multi-channel strategy and experience working with multiple device formats
 - Proven track record in identifying, justifying and subsequently solving various interaction design problems
