

Advanced Support Cover Letter

88200 Beer GlensLeuschkefort, AZ 96306-1671

Dear River Ortiz,

In response to your job posting for advanced support, I am including this letter and my resume for your review.

In my previous role, I was responsible for guidance in relation to automation and process execution based on good business process knowledge and Oracle expertise.

My experience is an excellent fit for the list of requirements in this job:

- Strong proficiency in Java or Python, RESTful Web Services
- Experience working with Tier 1 consulting firms and their internal CIO's in managing production support and implementation for large insurance carriers
- Strong understanding of DevOps, tools used for implementing a structured Devops environment
- Experience in Devops technology suite and implementation of automation using various tools and techniques
- Experience working in a highly collaborate environment
- Efficiency, accuracy and commitment to meeting deadlines
- Interest in the substance and commercial impact of Bain's work
- Enthusiasm, dedication, motivation in working with technology and supporting others on its use, driven by delivering insights through analysis

I really appreciate you taking the time to review my application for the position of advanced support.

Sincerely,

Sutton Klein
