

Aerodynamics Engineer Cover Letter

93939 Lashanda JunctionRunteville, DE 48284-0082

Dear Greer Graham,

I would like to submit my application for the aerodynamics engineer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for engineering support for Flight Safety System requirements development for the SLS Program for the Block 1/1B vehicle configurations.

My experience is an excellent fit for the list of requirements in this job:

- Experience with Fortran Coding is preferred
- Have an understanding of core engineering test procedures and equipment
- Familiarization with statistical methods for CFD uncertainty quantification
- Be proactive and show initiative and resourcefulness to be able to operate with limited direction from the department manager
- Excellent communication skills in order to successfully present to key persons at development milestone meetings and to help influence stakeholders during the performance planning process
- Good project management skills, especially in relation to work planning and time management
- Good problem solving and data analysis skills, including experience of using tools such as KT, FTA, FMEA
- Optimize golf ball performance through surface geometry modifications

I really appreciate you taking the time to review my application for the position of aerodynamics engineer.

Sincerely,

Sawyer Weissnat
