

Agile Developer Cover Letter

4480 Bradtke Gardens West Kaleyburgh, WA 94175-6262

Dear Royal Treutel,

In response to your job posting for agile developer, I am including this letter and my resume for your review.

In the previous role, I was responsible for recommendations on technology roadmaps, team development standards, system architecture / integration, product design, data modelling and testing.

My experience is an excellent fit for the list of requirements in this job:

- Interest in pair-programming
- Enthusiasm for community, learning, and collaboration
- Excitement about open source software
- Gain experience in communication and technical skills working with Product Owners and other Agile Developers
- Develop superior skills in software design, testing and analyzing code, and first-to-market strategy
- Design and execute test scenarios to fully exercise user stories
- Employ continuous integration, test driven-development, unit tests, end-to-end automation, risk-analysis, testing best practices
- Participate in Sprint planning meetings, effectively estimate user stories, commit and execute on team tasks

Thank you for considering me to become a member of your team.

Sincerely,

Tatum Mosciski
