

Aircraft Electrician Cover Letter

24382 Lebsack ForksSouth Kimtown, VT 05830-9496

Dear Gray Kuhlman,

I submit this application to express my sincere interest in the aircraft electrician position.

In my previous role, I was responsible for liaison to the Navy Operations Group, OPNAV N885 and other key stakeholder organizations.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Prior lead technician experience
- Knowledge of shop mathematics and practices, electrical/electronic theories and avionics systems sufficient to perform assigned duties
- Basic computer skills, including aircraft-related systems and basic office software packages
- Cuts and strips wire, terminates and insulates connections, and performs all other duties necessary in the installation process
- Attaches wire to complicated electrical systems, fixtures and accessories such as transformers, instrument panels, and switchboards with fasteners such as bolts, screws, or solder
- Experience installing and routing aircraft harness assemblies and stripping and crimping wire terminations
- Experience using a variety of manual hand tools such as crimpers, strippers, wire cutters, heat shrink gun, specialized aircraft test equipment
- Some structure experience for minor hardware installations

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Skyler Reichel
