

# Aircraft Electrician Cover Letter

75848 MacGyver MissionCareyshire, NJ 62568

**Dear Rory Pfeffer,**

In response to your job posting for aircraft electrician, I am including this letter and my resume for your review.

In my previous role, I was responsible for input to the AEMS (Aircraft Engine Management System) through ETRs (Engine Transaction Reports) and perform closeout of log books upon completion of maintenance transactions.

Please consider my qualifications and experience:

- Working around energized sources (electrical equipment and hazards/shock, circuit breakers and wiring) and exposure to constant noise
- Flexion/extension (head bent down, head bent back), finger manipulation, handling, kneeling, bending at the waist, reaching (overhead), Lying down (back, side, front), rotation of head/neck, standing, twisting at the waist, walking
- Finger manipulation (keyboarding, other)
- Knowledge of MIL-DTL-38999 connectors and SAE-AS-A39029, MIL-PRF-29504 termini fabrication
- Knowledge of AS50881 engineering design, MEPS, ACS and 1TD specifications
- Experience in fiber optic termini fabrication
- Experience in leading off-site aircraft and laboratory modification team
- An active DoD secret or top secret security clearance

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Skyler Bins
