AngularJS Developer Cover Letter

345 Bergstrom RampEast Buckview, WY 33009-5348

Dear Emerson Mraz,

In response to your job posting for angularjs developer, I am including this letter and my resume for your review.

Previously, I was responsible for technical support for the Product Profile for Annuities (PPfAs) and Distributor Profile for Annuities (DPfAs) utilizing XML file formats and VTXML tool.

Please consider my experience and qualifications for this position:

- Proven proficiency in developing Angular web applications
- Knowledge and awareness of emerging technologies and protocols for web based applications
- Expertise in frontend building, testing and profiling technologies such as Bower, Grunt, Jasmine, Karma or Protractor
- Basic knowledge of Unix based systems
- We appreciate all of our applicants, but we are not able to sponsor at this time
- Good understanding and programming experience
- Knowledge of common JavaScript libraries (jQuery, Lodash)
- Proficiency with Angular (1.x, 2.x)

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Royal Kunze
