

AngularJS Developer Cover Letter

381 Koepp CliffIngerfort, WI 11846-7109

Dear Onyx Parisian,

In response to your job posting for angularjs developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for feedback related to product integration, internally developed infrastructure components and application templates based on project experience.

Please consider my experience and qualifications for this position:

- Strong fundamentals in HTML5 and CSS3
- Significant experience with the Angular framework
- Experience working with agile software development practices
- Experience with developing unit and end-to-end test cases using Jasmine, Cucumber, and Protractor
- Experience with creating build scripts using Grunt or Gulp
- Qualification- BE,BTech,Mtech.MCA,BCA
- Deep understanding and experience of Full Stack web preferable
- Extensive front-end development experience to work with a dynamic and fun-loving entrepreneurial atmosphere while growing the interaction between our users and our content

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Onyx Reynolds
