

Application Engineering Cover Letter

88548 Price IslandsNew Christiville, UT 92803-0739

Dear Morgan Metz,

In response to your job posting for application engineering, I am including this letter and my resume for your review.

Previously, I was responsible for engineering expertise and services to regions for operational issues primarily involving pipelines, pump stations, valves, tanks, and related mechanical equipment.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Become familiarized with the overview of the products
- Work on a GUI (graphical user interface) to provide a user-friendly interface for a programmable IC used in a power system
- Collaborate with colleagues in Germany
- Perform laboratory performance evaluation work on new integrated circuits
- Foster innovative environment for peers and staff
- Design, implement and test high quality products
- Knowledge of big data analytics, performance, capacity and configuration management domains
- Java skills (specifically JSP / Servlets) and Perl scripting a bonus

Thank you for considering me to become a member of your team.

Sincerely,

Justice Farrell
