

Assessment Analyst Cover Letter

630 Kohler JunctionsShakitashire, PA 44640-2046

Dear Lennon Douglas,

I submit this application to express my sincere interest in the assessment analyst position.

In my previous role, I was responsible for real-time guidance to customers on network configuration, security settings and policies, and attack mitigation procedures.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with IT and software development environments
- Demonstrated experience in developing and analyzing estimates-at-complete utilizing various methodologies
- Personal professional services for the client to assist with planning and coordinating activities of a team conducting protection program higher headquarters assessments at Army installations
- Personal professional services for an Army client and assist with planning the coordination activities of a team conducting protection program higher headquarter assessments at Army installations
- Assessment work as part of a team, including data gathering, research, and coordination and assist with documenting and reporting the findings of installation assessments
- Good knowledge of Microsoft C# Language and .Net Windows desktop development
- Database knowledge of either Microsoft SQL Server, Oracle, or Microsoft Access
- Excellent spoken communication skills - contribute/ propose in meetings

Thank you for your time and consideration.

Haven Botsford
