

# Asset Liability Analyst Cover Letter

8698 Thompson PortsKossmouth, VA 18235-8388

**Dear Denver Roob,**

I submit this application to express my sincere interest in the asset liability analyst position.

Previously, I was responsible for a dotted-line oversight of accounting operations for a client, working closely with the client accounting team assigned to that client.

My experience is an excellent fit for the list of requirements in this job:

- Assist overseas centres on issues relating to system data, configurations, and workflow
- Provide advice to overseas centres on reporting/analytical processes, regulatory guidelines, and treatment of balance sheet items under ALM risk
- Engage with Global Treasury, Corporate Treasury, and Business Units on the drivers of risk figures and to address queries and information requests
- Direct experience (reporting, policy/model development, or system development) with Interest Rate Risk in the Banking Book and/or Basel III LCR/NSFR preferred
- Extensive coursework and knowledge in statistics, math, economics, finance or actuarial science
- Practical knowledge of financial instruments/derivatives preferred
- Knowledge and experience with computer programming
- Experience with the development and enhancement of valuation and risk management models

**I really appreciate you taking the time to review my application for the position of asset liability analyst.**

Sincerely,

Justice Crooks
