

Associate Art Director Cover Letter

76269 Wilderman Mountains East Frances, AR 81356-2569

Dear Rory Schulist,

In response to your job posting for associate art director, I am including this letter and my resume for your review.

In my previous role, I was responsible for direction to the creative team and internal clients regarding email design standards, tools, and guidance on communicating corporate image and Brand identity.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- In-depth knowledge of texture mapping and material
- In-depth knowledge of particle driven effects and shader systems in a readily available industry standard game engine such as Unreal, Unity and CryEngine
- Notion of visual story telling
- Experience in the video games industry is preferred
- Portfolio of work samples that include produced TV spots that fall within the comedic category
- Mastery of Adobe software, primarily InDesign, Illustrator and Photoshop
- Able to mentor junior art directors
- Accepts guidance and responds well to criticism

I really appreciate you taking the time to review my application for the position of associate art director.

Sincerely,

Blake Osinski
