

# Automation Cover Letter

41373 Langosh ValleyWest Luanatown, NY 72724

**Dear Gray Howell,**

I submit this application to express my sincere interest in the automation position.

In my previous role, I was responsible for monthly reporting to identify tests per application, feature coverage by application (along with change if any), tests run in production daily by application, and defects found per application.

Please consider my experience and qualifications for this position:

- Working knowledge of a 1 or more DevOps Pipeline technologies such as Continuous Integration, Continuous Deployment or Continuous Test
- Familiarity with tools used in DevOps such as git, gradle, maven, artifactory, junit, googleTest, jmockit, googleMock, cucumber, eggplant, Jira, Jenkins
- Familiarity with Agile Development practices and how to apply these techniques in a highly regulated industry
- Experience in reporting progress and technical approach with program management and customer
- Experience in being a transformational leader in taking an organization from one paradigm to another
- Experience executing a software development and maintenance program
- Willing and able to work holidays, weekends, and overtime
- Willing and able to speak, read, and write English

**Thank you for taking your time to review my application.**

Sincerely,

Emerson Bruen
