

Aviation Engineer Cover Letter

5775 Hong Walks
Neelyborough, IA 38434

Dear Briar Russel,

In response to your job posting for aviation engineer, I am including this letter and my resume for your review.

Previously, I was responsible for stress analysis for repair solutions on commercial nacelle hardware that are compliant with certified type design and airworthiness (FAA/EASA) requirements.

Please consider my qualifications and experience:

- Experience developing applications using web standards such as HTML, CSS, JavaScript, DOM, and HTTP
- Experience with NoSQL databases, such as MongoDB or CouchDB
- Experience with software development quality methodologies such as nightly builds, unit testing, static code analysis, and code reviews
- Experience with Windows software deployment and administration
- Familiarity with asynchronous I/O programming
- Continuous integration/deployment tools such as Jenkins
- JavaScript frameworks such as Node.js, Electron/NW.js/node-webkit
- Caching technologies such as Memcached or Redis

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Dakota Powlowski
