

# Aviation Engineer Cover Letter

774 Tommy CovesLake Stacy, GA 74777

**Dear Ryan Koelpin,**

In response to your job posting for aviation engineer, I am including this letter and my resume for your review.

Previously, I was responsible for technical solutions to minimize aircraft downtime on all Collins Aerostructures commercial nacelle hardware that are compliant with certified type design and airworthiness (FAA/EASA) requirements.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Knowledge of Aviation Support Equipment
- Experience with ship installed systems, Aviation operations and diagnostics
- Designing, implementing and supporting highly scalable cloud based applications and REST based web services in JavaScript (Node.js)
- Designing, implementing and supporting various tools/applications in Python, Bash, C/C++, Java
- JavaScript frameworks such as Electron/NW.js/node-webkit
- Caching technologies such as Memcached
- NoSQL databases such as MongoDB and Redis
- Message queuing systems such as RabbitMQ or Kafka

**I really appreciate you taking the time to review my application for the position of aviation engineer.**

Sincerely,

Lennon Prohaska
