AWS Architect Cover Letter

6828 Swaniawski LightStantonstad, OH 93219

Dear Hayden McDermott,

I submit this application to express my sincere interest in the AWS architect position.

In my previous role, I was responsible for technnical leadership, oversight on design, development and implementation of our application using AWS technologies and capabilities.

Please consider my qualifications and experience:

- Cloudformation Template development (preferably in YAML)
- Agile methodologies (SCRUM) and tools (JIRA, Rally)
- GIT / Github usage
- Knowledge of integration with REST based API services
- Advanced / Proficient spoken and written English
- Knowledge of Orchestration tools
- Knowledge of Containers (Docker / ECS)
- Automated deployment / continuous integration methodologies

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Zion MacGyver
