**Dear Rowan Wisozk,**

I would like to submit my application for the AWS architect opening. Please accept this letter and the attached resume.

In the previous role, I was responsible for recommendations to clients with respect to cloud migrations and prepare technical implementation roadmaps for AWS adoption.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Creating business cases for transformation and modernization, including analysis of both total cost of ownership
- AWS Certification – Solutions Architect –Associate / DevOps Engineering Professional / Developer
- In depth knowledge of key AWS services- EC2, S3, RDS, ELB, VPC, ElastiCache, CloudFormation, CloudWatch
- Understand Agile methodologies and software development life cycle process
- Understanding of container technology and container orchestration platforms
- Knowledge of best practices and market trends pertaining to Cloud and overall industry to provide thought
- Proven knowledge of leading Cloud Management Platform and orchestration tools
- Proven knowledge of evaluating the AWS hosting consumption charges and optimization of the charges

**I really appreciate you taking the time to review my application for the position of AWS architect.**

Sincerely,
