

AWS Cloud Engineer Cover Letter

19067 Benny Wells Russelstad, PA 37654

Dear Corey Beier,

I submit this application to express my sincere interest in the AWS cloud engineer position.

In my previous role, I was responsible for support and coordination with Public Cloud Providers such as AWS, Azure and Google Cloud to ensure tight alignment and joint strategy.

Please consider my qualifications and experience:

- Amazon Web Services (certifications preferred)
- Team collaboration tools
- Source code management tools & artifact management
- Communicating problems and solutions clearly and concisely
- Overall IT knowledge on at least fundamental level (storage, virtualization, networking, load-balancing)
- Scripting experience is considered an advantage
- ITIL v3 certificate or knowledge of ITIL operations processes is considered an advantage
- AWS SysOps Engineer certificate is considered an advantage

Thank you for your time and consideration.

Sincerely,

Shae Labadie
