

AWS Cloud Engineer Cover Letter

36521 Lorenzo RoadNorth Earltown, SD 30744

Dear Robin Gusikowski,

I submit this application to express my sincere interest in the AWS cloud engineer position.

In the previous role, I was responsible for technical leadership by identifying how new services can be implemented using core backend services and AWS cloud services.

My experience is an excellent fit for the list of requirements in this job:

- Experienced with either an AWS Operations or Engineering team
- Experience with Source Control Management tools (GGithub)
- Design, build, automate and run an AWS big data engine that powers quantitative and qualitative analyses of large and complex healthcare data sets
- Greenfield development with possibility of using many of the latest AWS products and technologies
- Help our multi-disciplinary business, data science and product teams to understand and build market leading products in digital analytics, tailored generation of medical content, Internet of Things and personalized eHealth solutions
- Find solutions for incorporating the latest technology and services while staying compliant to healthcare regulations and data privacy guidelines
- Drive automation and industrialization of the Healthcare Insights Engine resulting in market leading operational excellence
- Continuously evaluate and bring new technologies and services into our infrastructure to help us focus on our core business, helping people to get and stay healthy

Thank you in advance for reviewing my candidacy for this position.

Sincerely,
