

# AWS Cloud Engineer Cover Letter

15886 Lanny Circle  
Shanahanfort, GA 32660

**Dear Dallas Adams,**

In response to your job posting for AWS cloud engineer, I am including this letter and my resume for your review.

In my previous role, I was responsible for technical leadership in cloud security architectures, establish consistent delivery approach in cloud security engagements and keep up-to-date on relevant emerging technologies, as well as, industry trends.

My experience is an excellent fit for the list of requirements in this job:

- Hands on experience supporting AWS native enterprise business applications, hybrid applications
- Experience troubleshooting complex production incidents in cloud native applications
- Experience with Business Continuity and Disaster Recover design, planning and implementation for virtualized infrastructures
- Active Secret security clearance and be able to obtain a Top Secret security clearance
- Experience designing, developing, deploying, testing in AWS and Azure architecture
- Strong knowledge of AWS Cloud environment
- Requires in-depth, hands-on expertise in Oracle 11g/12c and Linux
- Requires general knowledge and hands-on experience in all database disciplines, including logical and physical database design, database implementation, access optimization, security, storage management, system and application performance management, and database systems administration

**Thank you for considering me to become a member of your team.**

Sincerely,
