

AWS Cloud Engineer Cover Letter

90540 Alfredo ViaNew Rodborough, WI 43164

Dear Tatum Hamill,

In response to your job posting for AWS cloud engineer, I am including this letter and my resume for your review.

Previously, I was responsible for guidance on core components such as backup, recovery, monitoring services within AWS and work with the infrastructure teams with expertise in their respective areas for design, implementation and integration into with on-prem private cloud.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Work with diverse teams to provide advice and assistance with budget estimates, tools choices, and to translate business needs to appropriate cloud native application design
- Fluent in Python, Ruby, Go or similar languages for developing Linux applications
- Fluent in the Linux command line and adept at system administrative tasks on Linux
- Able to work with various development teams to implement and assist with best practices
- Familiarity with Continuous Delivery and software development / deployment concepts
- Understanding of basic networking and common internet protocols
- Amazon Certifications preferred
- Strong understanding of git

Thank you for taking your time to review my application.

Sincerely,
