

# AWS Engineer Cover Letter

522 Colette BypassGeorgiannemouth, OK 09117

**Dear Azariah Waelchi,**

In response to your job posting for AWS engineer, I am including this letter and my resume for your review.

In my previous role, I was responsible for standardized code and templates for AWS services and cloud tools to project teams and help them integrate into their applications.

Please consider my qualifications and experience:

- Capable of data processing and transference outside of ETL tools or databases (scripts to pull and load from APIs or Files)
- Excellent communication, prioritization and analytic skills
- Excellent knowledge of software troubleshooting
- Understanding of TCP/IP networking, architecture and core technologies (DNS, LDAP, NFS, FTP)
- Experience working in large scale distributed Linux environments
- Experience in Oracle or other RDBMS
- System Engineering experience in a related industry
- Knowledge of PaaS /IaaS stack and best practices in micro-services/cloud world

**Thank you for taking your time to review my application.**

Sincerely,

Sawyer Bergnaum
