AWS Engineer Cover Letter

57326 Chuck WalkMirthaborough, NV 12418

Dear Campbell Fay,

I would like to submit my application for the AWS engineer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for support to AWS infrastructure security and help with configuration of AWS firewalls and WAF.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Familiarity with configuration management systems and concepts
- Familiarity with any of the systems and tools we use, including Apache, Tomcat, LogicMonitor, AppNeta, ELK (ElasticSearch/LogStash/Kibana), and DynaTrace
- Experience working with and managing third party service providers
- Experience working in an agile, fast paced, team centered environment
- Building web applications with Aurelia, Angular, Node, Serverless
- Build pipeline for backend infrastructure, Infrastructure as Code
- Familiar with backend mobile architecture
- Setting up monitoring functions for games

I really appreciate you taking the time to review my application for the position of AWS engineer.

Sincerely,

Haven Graham
