AWS Engineer Cover Letter

18026 Keira RoadCrookstown, GA 86465

Dear Briar Murphy,

I would like to submit my application for the AWS engineer opening. Please accept this letter and the attached resume.

Previously, I was responsible for aWS Administrator support for the Sponsor's AWS-hosted infrastructure and applications services including resource provisioning / configuration / monitoring and break/fix resolution across the Sponsor's environments.

My experience is an excellent fit for the list of requirements in this job:

- Experience with VMware, especially VMware APIs
- Credible experience in the public cloud
- Leverage a successful balance between security, access control, and auditing capabilities in the public cloud
- Working knowledge of cloud storage solutions
- Strong Linux (preferably with Red Hat or Suse) administration experience
- Experience with building and operating software in the cloud (AWS preferred)
- Configuration management experience using tools such as Ansible or Puppet
- Hands-on experience with Jenkins or other CI/DevOps tool sets

Thank you for taking your time to review my application.

Sincerely,

Story Rodriguez
