

AWS Engineer Cover Letter

82304 Johnetta TunnelLanton, WV 82830-3676

Dear Baylor Cole,

I am excited to be applying for the position of AWS engineer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for essential infrastructure services and solutions in the cloud including migration of servers and storage solutions using Nasuni, AWS and Azure.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Setting up Infrastructure and Application Monitoring for AWS (Really familiar with cloud operations & AWS)
- Checking bugs on app store
- Support and guide AWS developers and Devops engineers
- Unit test experience
- Design Low Level Detailed Migration Plans for Workloads from any platform to AWS
- Utilize workload migration tools to AWS
- Implementation and documentation of best practices
- In depth knowledge of AWS products and services

Thank you for taking your time to review my application.

Sincerely,

Brooklyn Morissette
