

Back-End Developer Cover Letter

8841 Brittanie FerryWest Alfonsoland, FL 16991

Dear Frankie Runte,

In response to your job posting for back-end developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for mentoring and guidance to more junior level engineers; may provide feedback and direction on specific engineering tasks.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with SQL and relational databases (SQL Server, SSIS, DTS, Oracle, MySQL), Excel, data extensions, query activities, data filters
- Experience with development technologies (HTML, XML, JavaScript, Web Services, SOAP, REST)
- Work closely with the internal data team to create and maintain appropriate data feeds between our partner and Salesforce Marketing Cloud
- Previous eCommerce, HTML, or email production experience preferred
- NET back-end stack of technologies
- Agile methodology experience (preferably Scrum)
- ISAM/VSAM file structures
- A team player that demonstrates passion for software and delivery

Thank you for taking your time to review my application.

Sincerely,

Morgan Bogan
