

Back-End Developer Cover Letter

189 Augustus Course North Galenport, CO 63893

Dear Justice Rau,

I am excited to be applying for the position of back-end developer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for software engineering life-cycle ownership of company products and technologies.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Strong programming/scripting background with extensive knowledge of Unix/Linux, Windows, shell scripting
- Java and/or C++, Objective-C, Python, Perl, Groovy
- Experience of working with code repositories like SVN, GIT & automation of configuration management tasks, along with other tools/applications like JIRA, Confluence, Team City/Jenkins, Fish Eye etc...
- Experience with real time, high volume transaction systems preferred
- Experience in a large server farm/environment
- Hands-on experience with JDK 1.7 and above
- Strong working experience in Java/J2EE and open source frameworks like Spring, Spring Integration, Spring Data, Spring Boot, Hibernate, JAXB, XML
- Experience with Angular JS Framework/ J-Query/ Slick Grid / BootStrap, Underscore JS, lodash JS frameworks etc

I really appreciate you taking the time to review my application for the position of back-end developer.

Sincerely,

Lennon Heaney
