Back-End Developer Cover Letter

406 McGlynn HarborAndrewchester, ID 89889-1948

Dear Lennox Wiegand,

I would like to submit my application for the back-end developer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for post-production support including fixing bugs and defects as well as resolving technical issues experienced by users.

Please consider my qualifications and experience:

- Clear and consistent experience participating in planning and leading the development of search engine optimized ecommerce experiences and web applications
- Strong understanding of a broad range of development languages and frameworks including but not limited to ASP.NET (Web Forms, MVC), ADO.NET, JAVA EE, Web standards (XHTML, CSS, REST, XML,), MS SQL Server, Oracle DB, BB2, SSIS, SSRS and ETL
- Strong mentorship and leadership skills with respect to junior developers and others across IT Shared Services
- Familiarity with administration of IIS, networking, web farms and load balancing, and web caching technologies
- Our growing team
- Designing & scaling REST APIs in a distributed SOA system
- Building consumer facing apps (web or mobile) that scale
- Be part of an Agile team

I really appreciate you taking the time to review my application for the position of back-end developer.

Sincerely,

Shae Hansen
