**Dear Phoenix Metz,**

In response to your job posting for backend developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for a job description of the role, responsibilities and qualifications required for this position :  Solid core Java development experience, Strong basics in Datastructures & Algorithms, Practical hands-on with Databases, some exposure to testing, Frameworks and J2EE & Webtechnologies.

My experience is an excellent fit for the list of requirements in this job:

- Testing experience for backend, integration
- Experience in designing APIs
- Proven programming skills in Python with flask, SQLAlchemy and Marshmallow for JSONAPI
- Version control (gitlab) and collaboration tools (Jira, confluence)
- Experience in Jenkins as integration suite incl
- Getting in touch with us – straightforward and direct
- Experience in using and applying of OOD, OOP and potentially design patterns
- Understanding of the software development life cycle (SDLC) and engineering practices such as TDD, Continuous Integration, Continuous Deployment, Code Review

**I really appreciate you taking the time to review my application for the position of backend developer.**

Sincerely,

Landry Bernier
