

Backend Developer Cover Letter

24704 Miki Place
Erinport, HI 23031

Dear Cameron Hills,

I would like to submit my application for the backend developer opening. Please accept this letter and the attached resume.

In the previous role, I was responsible for ongoing support of web and distributed application systems in production including responding to service requests, problem analysis, resolution, escalation and reporting as necessary.

Please consider my qualifications and experience:

- Experience in developing web applications using at least one popular web framework (Sencha GXT, Wicket, GWT, Spring MVC)
- Experience developing applications with backend settlements and/or financial calculations
- GIT (or similar version control system)
- Proven working experience in J2EE, Spring, JavaScript, Servlets, Tomcat, JAXB, JDBC, WebSphere Application Server, JQuery, JSON, WARP, SVN
- Extensive Full Stack Development experience with a focus on building awesome APIs
- Strong experience with Java – in particular adept at concurrent programming and new approaches around reactive and stream based techniques
- Experience with Spring, and Spring Boot for Micro-services
- Comfortable working with Solution Architecture to arrive at the best outcome

I really appreciate you taking the time to review my application for the position of backend developer.

Sincerely,

Frankie Johns
