BI Engineer Cover Letter

9125 Oberbrunner StreetRunolfsdottirburgh, KY 70587-7245

Dear Charlie McDermott,

In response to your job posting for BI engineer, I am including this letter and my resume for your review.

Previously, I was responsible for implementations (in android, iOS, python, java, etc.) to support partner and client integrations.

Please consider my qualifications and experience:

- Proficient in dimensional data modelling, data management, data analysis and semantice layer design
- Experience in Cloud Computing Experience (e.g AWS, Azure)
- Has worked using CI/CD tools
- Design and drive the release process to ensure the data quality in our production environment
- Implement test-driven process in development cycle and convert test cases to production monitoring system
- Extracting, transforming and loading data from multiple sources to dimensional models
- Identify and drive analysis around data issues, propose resolutions, assess impact, and ensure successful outcomes
- Experienced in BI test, including ETL/DW test, release cycle test, production data monitoring

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Tatum Schamberger
