

Biochemist Cover Letter

998 Mosciski ValleyLake Haroldberg, ND 27635

Dear Riley Berge,

I submit this application to express my sincere interest in the biochemist position.

Previously, I was responsible for direction to Quality Control Coordinator, Chemistry Technical Specialist, and site supervisors in the review of QC data and the appropriateness of QC range changes.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Promote and comply with all Quality System requirements to include Track wise and CAPA knowledge and capabilities
- Promote and comply with all Environmental Health and Safety requirements
- Requires hands-on laboratory experience, performing experiments using basic lab equipment
- Requires good documentation (maintaining clear and concise records) and effective communication (written and verbal) skills
- Apply scientific and statistical principles and provide technical leadership to perform a wide variety of technical investigations arising out of reagent performance issues encountered during reagent manufacturing
- BS in biological sciences or chemistry with experience in protein expression and purification, including antibody technologies
- Strong knowledge of recombinant protein and antibody expression and purification techniques biophysical characterization of proteins and antibodies
- Familiarity with small scale high throughput expression and purification of antibodies

I really appreciate you taking the time to review my application for the position of biochemist.
