Business Information Systems Cover Letter

47904 Grant IslandFeilburgh, WY 23785

Dear Sutton Schimmel,

In response to your job posting for business information systems, I am including this letter and my resume for your review.

In my previous role, I was responsible for both formal and informal training on subjects of expertise on the Microsoft Dynamics AX applications to users and reviews user data and reporting per company business processes as part of quality assurance activities.

My experience is an excellent fit for the list of requirements in this job:

- Proficient at writing SQL to extract data from multiple enterprise data sources (SQL, Oracle, MySQL)
- Develop reports and analytical objects which meet business requirements of business organization
- Reviews existing programming problems from original design and makes modifications as necessary
- Significant prior experience managing Enterprise Systems
- Experience with Systems Integrators developing ERPs and or related ERP solutions
- Significant knowledge of Enterprise IT Hardware / Networking to be able to lead a team of IT Support professionals
- Enterprise Infrastructure - State of the Art Hardware / Networking Engineered Solutions
- Cross functional effectiveness, even with virtual network, and passion for excellence

Thank you for considering me to become a member of your team.

Sincerely,

Greer Crist
