

Business Information Systems Cover Letter

886 Phil BrookClarinda
fort, PA 57983

Dear Sawyer Fritsch,

Please consider me for the business information systems opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for control and feature support of Microsoft O365 application suite used by Tech Data.

Please consider my experience and qualifications for this position:

- Masters or Research Doctorate in Information Systems, or Decision Science, or Business Analytics, or closely related fields from an accredited institution
- Research Doctorate
- Experience in both Information Systems and Data Analytics areas
- Deep knowledge of relational databases, data warehousing, business intelligence and reporting tools is essential
- Experience solving business problems with technology and automation (CRM tools)
- Act as functional subject matter expert for use of PeopleSoft and Workday applications with associated customizations and interfaces, , legal and corporate communication systems
- Review and approve analysis and solution presented by technical teams from IT vendors using working knowledge of basic technical landscape and programming
- Support application development by being part of a project team and following SDLC processes to create deliverable assigned to

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Ari Thiel
