

Capacity Analyst Cover Letter

34311 Bradtke Locks West Oralia side, TN 63663-2427

Dear Rory Hilll,

In response to your job posting for capacity analyst, I am including this letter and my resume for your review.

In my previous role, I was responsible for support and analysis to model the "as-is" and "to-be" application services, makes recommendations for improving the underlying business processes in support of the application portfolio as required.

My experience is an excellent fit for the list of requirements in this job:

- Experience with reporting solutions (Microsoft Business Intelligence, Cognos)
- Analysis of volume detail and trends to support volume forecasting, resource modeling, and cost allocation processes
- Development and documentation of data sources in support of expanding business knowledge
- Development of Activity Base Costing models in order to support unit cost analysis and to calculate benefits of improvement projects
- Analyzes actual and predictable interacting operational activities of a business system to obtain quantitative, rational basis for decision making through the application of logic and scientific or economic disciplines and techniques
- Work on usually complex technical problems and provides solutions which are highly innovative and ingenious
- Experience with modeling languages like OPL-Studio, AMPL or GAMS
- SAP Production Planning, Work Order Management and Capacity Planning

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Parker Brakus
